

## USDOT ITS4US WEBINARS ON COMPLETE TRIP PROJECTS

### Proposal Overview

**SAVE THE DATE:** The ITS JPO is hosting a set of five free public webinars to allow each of the five deployment sites to publicly share their concepts of operations (ConOps), which are being developed as part of Phase 1. Each webinar will be held from 10:30 AM to 12:00 PM PDT and feature a different site.

The proposed Complete Trip deployment pilot project for California will be led by the California Association of Coordinated Transport (CALACT), and will span three states; California, Oregon, and Washington. The project team intends to develop extensions to the General Transit Feed Specification (GTFS) data specification, new data standards related to booking and payment integration, and new open source software applications tailored to provide easy tools for small transit agencies and their regulators to provide real-time booking, exchange service information, and track changes to the transportation network. The proposal's target populations will potentially be able to plan their trip, book their seat, and coordinate payment for their ride.

The webinar schedule is below:

- Atlanta Regional Commission – Wednesday, July 14, 2021
  - Register Here: <https://its4usconopswebinar-arc.eventbrite.com>
- University of Washington – Monday, July 19, 2021
  - Register Here: <https://its4usconopswebinar-uw.eventbrite.com>
