Solano County Transit (SolTrans) intends to retain a qualified and committed Engineering Design firm to prepare, design, engineer and provide consulting services for SolTrans’ planned Electric Vehicle/Bus Charging Infrastructure Construction Project at its Operations and Maintenance Facility located at 1850 Broadway Street in Vallejo, California and opportunity charging along SolTrans transit routes. The work/services described in this RFQ as well as the eventual construction of the described electrical infrastructure will be funded with a combination of federal (Federal Transit Administration), state, and local funding sources.

The RFQ (Request for Qualifications) was issued on Tuesday December 10, 2019. A non-mandatory pre-proposal conference is scheduled for January 7, 2020 at 11:00 in SolTrans’ Operations and Maintenance facility, 1850 Broadway Street, Vallejo CA. Qualification statements are due February 6, 2020 with a project start date of March 2, 2020.

Solicitation documents are available on the SolTrans Website:
